THE WALL GEORGIA

Immersive, Large-Format LED Production in a Virtual Volume Environment.

THE WALL GEORGIA

If you can dream it, you can film it.

The WALL Georgia is one of the largest and most technically robust, immersive, large-format LED virtual volumes in the United States, delivering filmmakers unprecedented creative freedom and control with unmatched mastery over locations, lighting, weather, and production budgets.

At The WALL Georgia you can film Key West sunsets ... all morning, the Vatican by noon, a car chase through Brooklyn that same afternoon. You are in control of your environment.

No longer are filmmakers at the mercy of Mother Nature, and budget-crushing company moves.

THE WALL GEORGIA

Manufacture

ROE / Processing: Brompton – 10 Bit HDR /
Server/Engine: Disguise VX4 & RX2

VX4: AMD W9100 Pro / RX2: nVidia Quadro A6000XR /

MAGNOLIA STUDIOS

a boutique culture

The Magnolia Studios campus is home to The WALL Georgia, SEG and Storytell Films. 54 secluded acres surrounded by pine forest.

Life here follows the concept of European feel, with forward thinking future design schemes following the same motif, both in creativity and social-consciousness.

We are a boutique production entity, certainly not the largest, but our sense of purpose is to provide productions a inventive film culture that we are growing . . . literally from the ground up, bit by bit, both in technical and creative offerings, and also in support services.

FROM THE EARTH

our own on site Catering

IN HOUSE CATERING

featuring the best of locally sourced farm raised ingredients prepared in the European flair and fashion, overseen by Michelin trained Chef Bastion.

E-Mobility Concepts

SOLAR CONCEPTS

As MDT is involved in EV x Solar concepts, we provide e-car sharing as well as mobility concepts on campus. We already do have a EV local partner in Atlanta.

EV SOLAR CHARGING CARPORTS promoting the undeniable future of vehicle mobility.

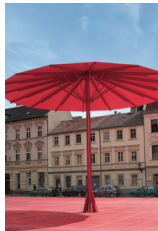

MDT-TEX

About MDT-tex

MDT designs, manufactures and supplies innovative, high-quality sun protection systems, membrane constructions and custom-made products for textile outdoor architecture to customers all over the world.

The company carries out the entire production process in its own cutting-edge factories at international locations. This guarantees the highest quality for innovative products and ensures absolute supply security.
